Comments:

- Nice to get a worldly prospective
- Excellent speaker. Bring him back to future conferences please (3)
- One of the best speakers of the conference.
- Thanks for bringing him here—very, very well done presentation and engaging
- It's nice to see that this diet is working on a large population.
- So thankful you were able to get him as a speaker. I hope to see him every year!
- Excellent new international addition to the ASBP and Metabolism groups
- Fabulous lecture! Loved hearing more about the Swedish approach.
- Always appreciate the opinions of others. Plus nobody (at least none of the women) fell asleep during this last lecture of the day.
- The most engaging speaker. Funny and entertaining as well as informative. I'd like to hear more about his daily clinical practice. I can't tell if he's more of a celebrity social media figure or an academic or a clinical obesity specialist. Does he see patients in a weight loss clinic 5 days/week?
- Very charismatic speaker! (2)
- Entertaining and meaningful

- A real eye opener presented in an inimitably humorous manner!
- Wow. Great speaker. Inspiring.
- I felt this was a lecture that was very entertaining but again did not have much useful information for the experienced bariatrician. I didn't learn anything I didn't already know
