

PREVIEW_ Tim Noakes trial (2018)

Nina Teicholz: The vested interest in defending the high carb low-fat diet are enormous.

Jayne Bullen: He didn't deserve to be put through these years of trauma.

Dr. Zoe Harcombe: He's perhaps the most eminent scientist in South Africa, A1 rated scientist.

Nina: Here was an official body that would record and put on the record the state of the science.

Jayne: There's nothing more threatening than the truth particularly in the case of big business and the science.

Prof. Tim Noakes: I tweeted in response to a request about infant feeding and I said, "Key is to wean baby onto LCHF."

Dr. Ajay Bhoopchand: If you give medical advice online, this might establish a doctor-patient relationship already.

Zoe: This was a tweet for goodness' sake. You do not establish a doctor-patient relationship on Twitter.

Tim: It was just a matter of getting the science before the committee.
